

THE
Headwaters
ECO LODGE

Named in TIME Magazine's 2019
World's 100 Greatest Places' list

THE ONLY NET ZERO-CERTIFIED LIVING BUILDING
CHALLENGE ACCOMMODATION IN THE WORLD

“Our goal is to connect our guests with the beauty of the land and the people of the area, all while renewing the body, mind and spirit.”

FOUNDER DEBBI BRAINERD

The Headwaters Eco Lodge is an ideal destination for corporate groups, conferences, incentive programs and leadership meetings. With the ability to offer a custom experience that is not only intimate but inspiring and completely different to anything you have done before the lodge is so much more than just a venue.

The Headwaters Eco Lodge was built to one of the highest standards of sustainability in the world, the Living Building Challenge. It also has the largest solar garden in New Zealand's South Island. The Headwaters Eco Lodge currently produces more energy than it consumes and has obtained its Net Positive Energy accreditation.

You'll discover what we made possible, even when all those around us said it was impossible. With so much to do and enjoy, right on our doorstep, our corporate retreats offer an amazing opportunity to mix both focus and relaxation, fuelling each other to better outcomes over the duration of your stay with us.

A PLACE TO GET INSPIRED

A spectacular backdrop and landscape that inspires all your senses while allowing you to refocus and escape the distractions back home.

A PLACE TO NOURISH YOUR MIND

Nestled in between two soaring mountain ranges The Headwaters Lodge nourishes the mind in every way, from the mind blowing scenery, crisp clean air and a place that creates space and opens your mind to new opportunities.

A PLACE TO GIVE BACK

All profits go directly into the Glenorchy Community Trust to support initiatives that benefit children, the environment, healthcare and the resilience of our local community.
